JAEGER™

About this catalog

We are pleased that you have chosen to use Jaeger Medical products.

The Jaeger Medical product portfolio ranges from small mobile devices to large pulmonary function laboratory devices. As a result, there is a variety of consumables and accessories associated with each specific product. This catalog is designed to ensure that you find the correct consumables and accessories for the specific piece of Jaeger Medical equipment you are using both quickly and effectively.

For ease of use the catalog has been divided into three hierarchical levels:

1. **Level 1:** functional areas such as Pulmonary Function Testing, Cardiopulmonary Exercise Testing, etc.

2. **Level 2:** subdivides the functional areas into specific device names. Look for the name of your device. If the device name is not clear, the device overview on the following pages will give you assistance.

3. **Level 3:** is a further subdivision of the devices into their measuring applications or product groups, e.g., spirometry.

The index at the end of the catalog can also be used to search for all consumables and accessories listed in the catalog.

Jaeger Medical consumables and accessories are designed, selected and validated specifically for Jaeger Medical devices. Please use only the original consumables and accessories from Jaeger Medical to ensure accuracy of results and patient safety.

We are happy to hear from you.
